DLO (S)

SERIES 2 CONTROL VALVE

Armstrong DLO (S)-2 Control Valve

The DLO (S)-2 cage-retained control valves are designed for general purpose control of clean, dirty, viscous or corrosive liquids, as well as low to medium pressure, clean or dirty steam and gas service.

The cage-retained seat design eliminates the need or use of any threaded internal parts insuring ease of maintenance and parts replacement even after years in corrosive service. Top entry design also permits easy access to all internal parts for inspection or maintenance without removal of the valve from the pipeline. The DLO-2 class also features the highest Cv capacity of any comparable single seated valve in the industry providing maximum flows and minimum pressure losses. Two point stem guiding provides rigid plug guiding and makes these valves especially suited for controlling dirty liquids or steam.

Through-bolted bonnet on cast steel and stainless steel valves, in lieu of bonnet studs, makes valve servicing easy, even after many years of service in corrosive environments.

SIZES 1/2" - 4" ANSI CLASS 125/250, 150/300

- | Cage Retained Seat eliminates threaded internal parts
- **Top Entry** permits easy in line maintenance
- Highest Cv's of any comparable single seated valve
- Two Point Stem Guide minimizes trim wear and seat leakage
- Tight Shutoff with choice of seat materials for Class IV, V or VI
- | Multiple Trim Selections to suit a wide variety of applications
- One Piece Plug and Stem ensures proper alignment and will not separate
- **Bolted Actuator Yoke** guarantees easy disassembly
- Ultra Compact Actuators install in tight spaces

Armstrong International owns the exclusive rights to Aeroflow®, D-Boy™, DLO™, K-Max™, DOS, D-Series, and DOT™ Control Valves—all formerly sold by Leslie Controls. This includes the engineering and design of these product lines and all technical details.

Armstrong owns the exclusive rights to manufacture these legacy brands and OEM spare parts, adhering to the original specifications and drawings, and quality backed by the outstanding service, technical support and expertise Armstrong is known for. Armstrong International and its contractual representatives have exclusive rights to sell these product brands.

APPLICATION DATA

Process control systems for food, pulp and paper, chemical petrochemical & other industries

HVAC systems

| Feed water and fuel system controls in boiler rooms

Packaged systems (OEM) such as heat exchangers, water purification systems & vaporizers, metal cleaning and plating

OPTIONS

Soft Seats

Threaded, Flanged, Buttweld or Socketweld Connections

Reduced Port Trim

BODY ASSEMBLY

Style: Single seated, top entry bolted bonnet, globe style body, cage retained seat, unbalanced plug

ANSI BODY RATINGS

Cast Iron: Class 125 & 250 (DIN ND16 & ND40)
Steel and alloys: Class 150 & 300 (DIN ND16 & ND25)

BODY/BONNET MATERIALS

- Cast Iron, ASTM A126 Class B
- Carbon Steel, ASTM A216 Gr WCB
- 316 stainless steel, ASTM A351 Gr CF8M

Note: See ANSI B16.1 (cast iron) or ANSI B16.34 (other materials) for pressure/temp. limits of body/bonnet assemblies.

PACKING CONFIGURATIONS

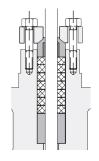

PTFE - V-Ring

PTFE V-ring packing provides the most maintenance free stem seal. The V-ring packing is both pressure and spring energizedto automatically compensate for packing wear Maximum service temperature is 460°F (238°C). V-rings can be inverted for vacuum service.

PTFE/Graphite

Split rings allow packing replacement without removal of actuator Graphite impregnated PTFE provides 500°F (260°C) service temperature, better memory and sealing than pure PTFE rings, lowered stem hysteresis, and is ideal for fluids that contain suspended particles.

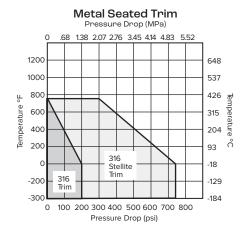

High Temperature Laminated Graphite

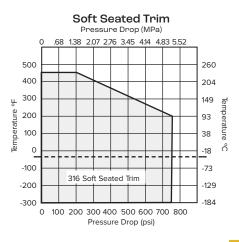

Precision die-cut laminated graphite rings provide a reliable, tight stem seal to operating temperatures of 800+°F (426°C).
